ABSTRACT

Four-year graduation rates by high school, district, county, and state were studied for Arizona for 1992. Members of the class of 1992 were identified as those who were first-time ninth graders in the 1988-89 school year. Data was submitted by 156 high schools and special programs for 12th graders, but the reports of 5 districts (21 schools and programs) were eliminated because of unreliable data. The mean 4-year graduation rate was 67 percent, and the median was 70 percent. Rates ranged from 29 percent to 100 percent. The state goal of an 80 percent rate was met by 37 high schools, and almost one-third of the schools achieved the goal of eliminating a gap between minority and non-minority rates. The rate was slightly higher than the corrected rate for 1991, although not higher than the rate originally reported. Overall, mean graduation rates improved for all ethnic groups and both genders. Ten tables and five charts present statewide graduation information. Appendix A ranks the schools by graduation rate, and Appendix B reports graduation rates by county and state. Appendix C contains 172 pages of tables of graduation reports by school and school district. The graduation rate report form and instructions for completing it are in Appendix D. (SLD)

I. INTRODUCTION

This study attempts to determine the proportion of Arizona public high school students who complete requirements for a high school diploma within four years. Graduation rates are frequently used as a means of measuring a school's success in retaining and graduating students. Both the U. S. Department of Education and the Arizona Department of Education (ADE) are committed to improving high school graduation rates. The State established a goal of 80% graduation rate for the 1991-92 school year [1].

The nature of a longitudinal study requires diligence in tracking students over a period of time. Some districts, during the initial years of this study, will have difficulty retrieving historic information in the format required. ADE also recognizes that, because school staff are frequently unable to locate students who were unaccounted for in prior years, the graduation rates are likely to be understated and four-year dropout rates are likely to be overstated.

Last year, ADE analyzed graduation rate reports for the Class of 1991 from 145 high schools and special programs. This year, all 156 Arizona public high schools and special programs with twelfth grade students in 1991-92 submitted a graduation rate report for the Class of 1992. The reports are summarized herein.

---

[1] The Committee for Educational Excellence was established and its responsibilities were defined by A.R.S. 15-741.01 (A2); Laws 1987, Chapter 245, Section 1, as amended by Laws 1988, Chapter 55, Section 1; and Laws 1989, Chapter 16. The National Goal for graduation rates (Goal 2) was adopted by the State. It reads "By the year 2000, the high school graduation rate will increase to at least 90 percent. Objectives: The nation must dramatically reduce its dropout rate and 75% of those students who do drop out will successfully complete a high school degree or its equivalent. The gap in high school graduation rates between American students from minority backgrounds and their non-minority counterparts will be eliminated."

II. EXECUTIVE SUMMARY

The purpose of this study was to determine for every public high school in Arizona the proportion of students who completed graduation requirements within four years. Graduation rates were calculated by high school, district, county, and state to measure the success of student retention programs.

Membership in the Class of 1992 was defined as:

- **students who were first time ninth-graders during the school year 1988-89, plus**
- **students who transferred into that class at any time during the four years, minus**
- **students who died or transferred to another school during the four years.**

A graduate was defined as a student who:

- **completed graduation requirements for a high school diploma; or**
- **received a Certificate of Completion, Certificate of Attendance, or other non-traditional diploma recognized as meeting graduation requirements.**

All 156 high schools and special programs with twelfth grade students submitted graduation rate reports. Five districts, representing 21 schools and special programs, were eliminated from the analysis because their reports contained unreliable data. Based on the remaining 134 high schools and one special education program, the mean four year graduation rate[2] was 67%. The median[3] graduation rate was 70%. The graduation rates for high schools ranged from 29% at Estrella Mountain High School to 100% at Bowie High School and Grand Canyon High School.

The State's goal -- an 80% graduation rate by 1992 -- was met or exceeded by 37 high schools analyzed in this year's study. Another 20 high schools were within five percentage points of the goal. One objective of the goal was to eliminate the gap in graduation rates between minority students and their non-minority (White) counterparts. Almost one-third of the schools have achieved that objective [4]. The mean graduation rates by ethnicity were: White - 73%, Black - 57%, Hispanic - 57%, American Indian - 56%, and Asian - 77%. In all five ethnic groups, mean graduation rates were higher for females than for males. The average male graduation rate was 64%, compared to a female graduation rate of 71%. Graduation rates were lowest for

---

[2] The mean rate, also known as the average, is the number of graduates divided by the number of students in the Class of 1992.

[3] The median is the midpoint of schools' rates in rank order; half of the schools reported higher graduation rates and half reported lower rates.

[4] Minority graduation rate is equal to or greater than White graduation rate.

Mohave County (54%) and highest for Greenlee County (82%).

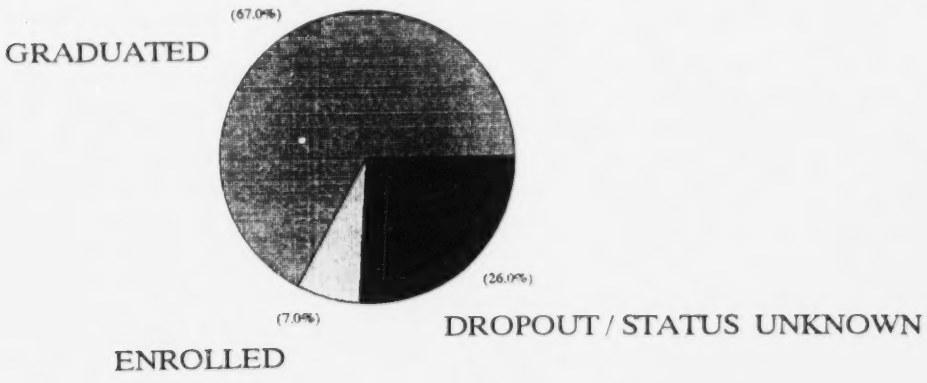
Seven percent of the Class of 1992 are still enrolled and could graduate in their fifth year. Males, particularly Indian and Hispanic males, were more likely than female students to be enrolled for a fifth year of high school. Twenty-six percent of the Class of 1992 had dropped out or their status was unknown at the end of the study. The reader should note that this is a **four** year, cumulative dropout rate, which should not be compared to the **annual** dropout rates reported from data collected in a separate study.

The graduation rate for the Class of 1992 was slightly higher than for the Class of 1991. Data from the 145 high schools and special programs in the Graduation Rate Study for the Class of 1991 had originally indicated a mean graduation rate of 67%. After that report was published, two schools made corrections to their data and ADE eliminated the data for two other districts when it became known their methodology was inappropriate. The revisions reduced the Class of 1991 graduation rate to 65%. The slight improvement in this year's mean graduation rate (from 65% to 67%) may be attributed to an actual improvement in the graduation rate and/or improvement in student recordkeeping, resulting in a fewer students whose status was unknown.

Comparing the Class of 1992 to the Class of 1991, the mean graduation rates improved for all ethnic groups and both genders. The graduation rates of 53 schools improved since last year's study; 15 schools' rates remained the same; and 57 schools had lower graduation rates this year. Last year, approximately 6% of the Class of 1991 was still enrolled and the status of 29% of the class was dropout/unknown. Fifth year graduates from that class raised the graduation rate from 65% to 69%. Fifth year graduation rates were higher for all minorities than for Whites.

The chart below shows the proportions of the Class of 1992 which graduated on time, were still enrolled, and whose status was unknown.

Chart 1
Status of the Class of 1992



III. DEFINITIONS, METHODOLOGY, AND LIMITATIONS

Definitions

Membership in the Class of 1992 was defined as:

- **students who were first time ninth-graders during the school year 1988-89, plus**
- **students who transferred into that class at any time during the four years, minus**
- **students who died or transferred to another school during the four years.**

A student was considered to have transferred to another school if there was verifiable evidence in the student record of enrollment in another educational program leading to a high school diploma, whether public or private, in or out of the state. Verifiable evidence included a transcript request from the other school or notification by a responsible adult that the student had enrolled in another school. If the student left school and enrolled in a school or educational program which did **not** offer courses leading to a high school diploma (e.g. barber/beauty school, other vocational training, or GED preparatory classes), the student was numbered among the dropouts and students whose status was unknown.

A graduate was defined as a student who:

- **completed graduation requirements for a high school diploma; or**
- **received a Certificate of Completion, Certificate of Attendance, or other non-traditional diploma recognized as meeting graduation requirements.**

A student who left school and earned a G.E.D. certificate was **not** considered a graduate.

After identifying the members of the Class of 1992, the school attributed one of three outcomes to each student: graduated, still enrolled, or dropped out/status unknown. The graduation rate for each school was calculated as the number of graduates divided by the number of students in the Class of 1992, expressed as a percentage. The proportion of students who were still enrolled was calculated as the number of students in the Class of 1992 who had not graduated and were still enrolled in school, divided by the number of students in the Class of 1992, expressed as a percentage. The dropout rate was calculated as the number of dropouts/status unknown divided by the number of students in the Class of 1992, expressed as a percentage. The reader should note that this is a **four year** dropout rate which should not be confused with the school's **annual** event dropout rates presented in a separate report. Generally, a school's four year dropout rate is less than four times the annual dropout rate because some dropouts return to school in a later year. Also, some students drop out and re-enter repeatedly and may be counted on more than one annual dropout report.

Methodology

In April 1992, ADE distributed forms and instructions for the Graduation Rate Study to all Arizona public high schools. The form and instructions are presented as Appendix D. Training workshops were held in ten locations throughout the state. Reports were submitted by all high schools which had twelfth grade students in 1991-92 [5]. The report data were entered into a database and the accuracy of the input was verified. Certain edit checks were randomly performed to test data reliability. When there were major discrepancies, the contact person at the school or district was notified by ADE and verification or corrections were solicited.

ADE verified the report data through the following processes:

- Original Enrollment (Line A of the Graduation Rate report) was compared to the school's Original Enrollment on the school's ninth grade Year End Enrollment report for 1988-89. Line A was expected to be equal to or slightly less than the Year End Enrollment, because students who were enrolled in Grade 9 for the second time in 1988-89 were not to be included in the Class of 1992.

- The number of graduates (Line F of the Graduation Rate report) was compared to the school's graduates from the twelfth grade Year End Enrollment report for 1991-92. They were expected to be roughly equivalent.

- The number of graduates was compared to the number of completers reported on the USDE Completer Survey. The Class of 1992 graduates should be equal to or slightly less than the total number of completers in the past year. The number of completers may be higher because it includes late graduates from all earlier classes, e.g. Class of 1991, Class of 1990, etc.

- The number of dropouts/unknown (Class of 1992 minus graduates and still enrolled) was compared to the total number of dropouts reported on Year End Enrollment reports for Grade 9 (1988-89), Grade 10 (1989-90), Grade 11 (1990-91), and Grade 12 (1991-92). Dropouts were expected to be roughly equivalent to the total reported over four years. The number of dropouts on the Graduation Rate report could be higher because summer dropouts were not reported on Year End Enrollment reports in prior years and because the dropout codes on Year End Enrollment reports did not include as many situations as

---

[5] River Valley High School (Colorado River Union High School District) and Westview High School (Tolleson Union High School District) will have their first graduating class in 1993. Centennial High School (Peoria Unified District) and Mountain Pointe High School (Tempe Union High School District) will have their first graduating class in 1994. Arizona Department of Youth Treatment and Rehabilitation is working toward becoming accredited and does not yet graduate students. There are no separate reports for East Valley Institute of Technology and certain other specialized programs conducted by some districts for vocational training or special education, because diplomas were issued through the students' home high school and the students were included in their home schools' graduation rate reports.

this study did. For example, students who withdrew from school to enroll in a GED or vocational certificate program were **not** defined as dropouts on the Year End Enrollment reports; they **were** dropouts in this study. Conversely, the number of dropouts could be lower on the Graduation Rate report because some students drop out repeatedly and were counted on more than one Year End Enrollment report.

- The number of Late Graduates from the Class of 1991 (Fifth Year Adjustments) was compared to the number of Still Enrolled from the Class of 1991 Graduation Rate reports. It was expected that fifth year graduates would represent a portion of last year's still enrolled. However, on 40% of this year's reports, the number of late graduates exceeded the number reported as still enrolled on last year's reports. This is possible because some of the students who were in the dropout/status unknown category last year could have re-enrolled in 1991-92 and graduated in the fifth year. It is also possible that students who had transferred out of the school's Class of 1991 re-enrolled and were counted as late graduates, although they should not have been, since they were not members of the Class of 1991 on that report.

In January 1993, there were still five school districts [6] whose reports had apparent errors or unreliable data. Those data were excluded from the database used for the statewide analysis.

Limitations

The most serious problem affecting data validity was the incompleteness of some schools' student recordkeeping systems. The study requires the use of four years of student records and some schools have discovered that some critical data elements were missing from their files. In particular, some student recordkeeeping systems have failed to account for monitoring students' activity (transfers out) over the summer. If a school had no documentation in the file that a student had transferred, and the school was unable to locate a reliable adult who could verify enrollment in another district, the student remained on the class list and was counted as a dropout/status unknown. The accuracy of the reports varies, depending on the sophistication of the school's recordkeeping system and the staff's ability to conduct the study.

The analysis of the Graduation Rate Study data was also affected by other factors:

- Students who were taught at home (not enrolled in a public school) were not included in this study. Graduation requirements have not been specified for home taught students, no diplomas are issued, and to date, there is no way to determine the proportion of home taught students who receive a GED certificate within four years.

---

[6] Cave Creek Unified (Cactus Shadows High School), Chinle Unified (Chinle High School), Gila Bend Unified (Gila Bend High School), Tucson Unified (all schools and programs), and Window Rock Unified (Window Rock High School)

- For some schools, the size of a subsample (e.g. Asian female) was very small, preventing a meaningful comparison of graduation rates expressed as percentages.

- Because a large school can weight the means, some of the measurements are relevant on an averaged basis and others are not. The reader must therefore interpret means cautiously. Medians and ranges are also cited in the analysis for comparative purposes.

- Some schools have not been operational for the full four years of the study [7]. Their reports begin with the sophomore class of 1989-90, the junior class of 1990-91, or the senior class of 1991-92, depending on the year the high school opened. Their one year, two year, or three year graduation rates are not strictly comparable to other schools' four year graduation rates.

- Last year, seven high schools [8] had not submitted Graduation Rate reports (Class of 1991) before the report was written; it was not possible to to calculate a five year graduation rate for six of those schools.

---

[7] Sinagua High School and Mogollon High School opened in 1989-90; East Valley Accommodation School opened in 1990-91; San Carlos High School and Chino Valley High School opened in 1991-92.

[8] Cibola High School did not submit a report for the Class of 1991. Dobson High School, Mesa High School, Mountain View High School, Red Mountain High School, and Westwood High School were unable to provide 1991 reports because of difficulties converting student records from one automated system to another. Ganado High School submitted a revised report after the 1991 analysis was complete.

IV. ANALYSIS

Profile

One hundred forty-eight Arizona public high schools and eight special programs, representing 101 districts, submitted Graduation Rate reports. The reports from five districts were considered unreliable because of major inconsistencies with Year End Enrollment reports filed over the past four years; those reports were excluded from further data analysis. The remaining sample represented 40,334 members in the Class of 1992, 134 high schools and one special education program, and 96 districts. The table below shows the ethnic and gender composition of the Class of 1992.

Table 1
Ethnic and Gender Composition of the Class of 1992

	Male	Female	Total
White	33%	31%	64%
Black	2%	2%	4%
Hispanic	12%	12%	24%
American Indian	3%	3%	6%
Asian	1%	1%	2%
Total	51%	49%	100%

Graduation Rates

The mean (average) graduation rate was 67%. The median graduation rate (the midpoint of the schools' graduation rates when ordered by rank) was 70%. The high schools' graduation rates ranged from 29% at Estrella Mountain High School to 100% at Bowie High School and Grand Canyon High School. Some of the variance in rates may be attributed to the proportions of ethnic groups and other characteristics of the schools' populations, but some of the variance should be attributed to differences in recordkeeping practices and dropout prevention efforts.

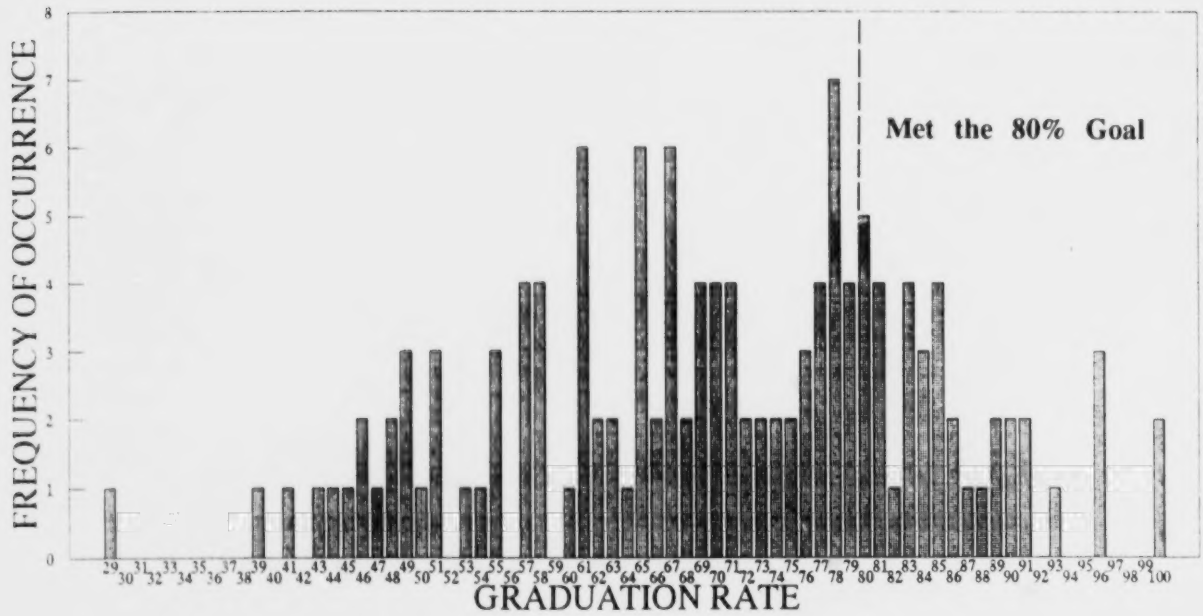
The State's goal -- an 80% graduation rate -- was met by 37 of the high schools in this year's study. Another 20 schools were within five percentage points of the goal. Twenty-one schools, shown in the table below, have met or exceeded the 80% graduation rate goal both years of the study.

Table 2
High Schools Which Achieved 80% Graduation Rate
Class of 1991 and Class of 1992

Apache Junction High School
Bowie High School
Bradshaw Mountain High School
Canyon del Oro High School
Chaparral High School
Flagstaff High School
Fredonia High School
Grand Canyon High School
Horizon High School
Independence High School
Ironwood High School
Joseph City High School
Marana High School
Mogollon High School
Mountain View High School (Marana)
Prescott High School
Ray High School
San Simon High School
St. David High School
Thatcher High School
Valley Union High School

The distribution of the schools' total graduation rates is shown in the chart below.

Chart 2
Distribution of Graduation Rates



Graduation Rates by Ethnicity and Gender

One objective of the State's goal was to eliminate the gap in the graduation rates between the minority ethnic groups and their non-minority (White) counterparts. When each school's collective minority graduation rate was compared to its White rate, 43 schools (32%) had minority rates that equaled or exceeded the White graduation rate. (Another five schools had no White students and two schools had no minority students for a comparison.) Sixty-three percent of the schools have not yet equalized their minority and non-minority graduation rates. In two high schools [9], the graduation rate for the minority population was more than forty percentage points below the graduation rate for White students.

The fourteen high schools which met the 80% graduation rate goal **and** had minority rates equal to or exceeding the White rates are listed in the table below.

Table 3
High Schools Which Achieved 80% Graduation Rate and Minority Rates Equal to or Exceeding White Rates

Bowie High School	Mountain View High School (Marana)
Bradshaw Mountain High School	Ray High School
Canyon del Oro High School	Saguaro High School
Dobson High School	San Simon High School
Fredonia High School	Snowflake High School
Grand Canyon High School	St. David High School
Joseph City High School	Valley Union High School

In all five ethnic groups, mean graduation rates were higher for females than for males. There was less difference between the male and female students in the Asian population (one percentage point) than among any of the other ethnic groups (seven or eight percentage points). Median graduation rates were highest for Asian students (87%), followed by White students (77%), Hispanic students (67%), Black students (64%), and American Indian students (60%). In the minority ethnic groups, graduation rates ranged from 0% to 100%. For White students the range of graduation rates was 36% to 100%. The table below shows the mean graduation rates by ethnicity and gender.

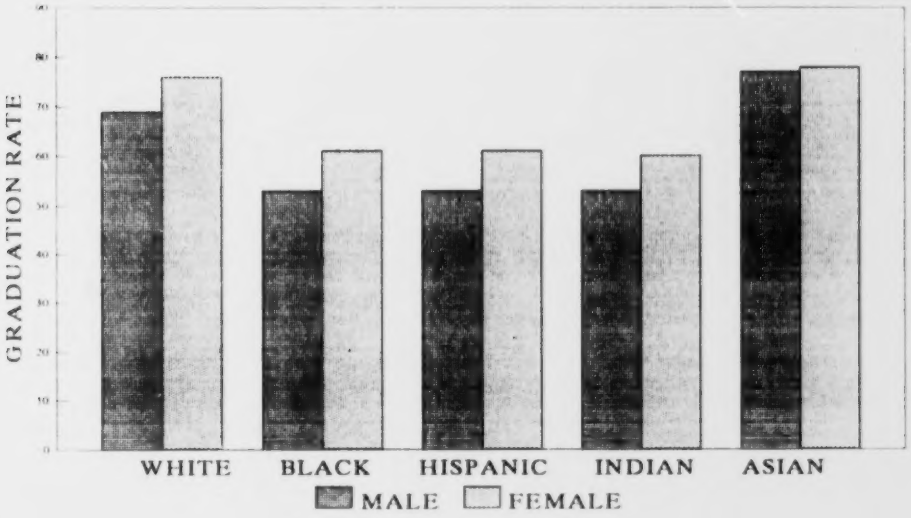
[9] Prescott High School and Tuba City High School

Table 4
Mean Graduation Rates by Ethnicity and Gender

Ethnicity	Male	Female	Total
White	69%	76%	73%
Black	53%	61%	57%
Hispanic	53%	61%	57%
American Indian	53%	60%	56%
Asian	77%	78%	77%
Total	64%	71%	67%

The mean graduation rates by ethnicity and gender are shown in the chart below.

Chart 3
Mean Graduation Rates by Ethnicity and Gender



Graduation Rates by County

Mean graduation rates by county ranged from 54% (Mohave County) to 82% (Greenlee County). The table below shows by county the number of high schools reporting, the number of students

in the population base, and the mean graduation rate.

Table 5
Graduation Rates by County

County	Schools	Students	Grad. Rate
Apache	5	526	68%
Cochise	10	1,587	63%
Coconino	8	1,386	75%
Gila	6	572	69%
Graham	4	378	78%
Greenlee	4	155	82%
La Paz	2	200	60%
Maricopa	49	24,759	68%
Mohave	4	1,259	54%
Navajo	9	1,231	73%
Pima	10	3,423	66%
Pinal	9	1,445	61%
Santa Cruz	2	590	57%
Yavapai	9	1,073	71%
Yuma	4	1,750	60%

Appendix B shows the graduation rate data summarized by counties.

Graduation Rates by Class Size

There was no relationship between mean graduation rates and class size. Two very small schools in the sample, Bowie High School and Grand Canyon High School, had 100% graduation rates, but several high schools with a class size of over 500 (Mountain View High School-Mesa, Dobson High School-Mesa, Horizon High School-Paradise Valley, Corona del Sol High School-Tempe, and Westwood High School-Mesa) were also ranked among the top 20% of schools in the study. The table below shows the graduation rates according to class size.

Table 6
Graduation Rates by Class Size

Class Size	Schools	Students	Grad. Rate
Under 100	43	2,083	71%
100 - 199	23	3,435	70%
200 - 299	14	3,434	76%
300 - 399	8	2,648	67%
400 - 499	13	5,698	73%
500 - 599	10	5,373	62%
600 - 699	9	5,641	67%
700 - 799	8	5,932	68%
800 or more	7	6,090	59%

Students Who Are Still Enrolled

By definition, the Graduation Rate reports the percentage of students in the class who finished **on time**, that is, within four years of beginning high school. At first glance, many readers assume the rest of the class dropped out, an assumption which does not consider that many students simply require more time to finish graduation requirements.

This year 2,635 students, approximately 7% of the Class of 1992, had not graduated but were still enrolled and could graduate in their fifth year of high school. Males, especially Indian and Hispanic males, were more likely than female students to be enrolled for a fifth year. The table below shows the proportion of each ethnic and gender group of the Class of 1992 which was still enrolled.

Table 7
Proportion of Class of 1992 Still Enrolled
by Ethnicity and Gender

Ethnicity	Male	Female	Total
White	7%	3%	5%
Black	9%	6%	7%
Hispanic	11%	7%	9%
American Indian	13%	9%	11%
Asian	9%	8%	8%
Total	8%	5%	7%

The schools reporting the highest proportion of students who were still enrolled were San Carlos High School with 29% and Valley High School (Sanders Unified District) with 24%. Six percent was the median rate of students still enrolled.

Members of the Class Whose Status was Unknown

Members of the Class of 1992 who had not graduated and were not still enrolled were classified as dropout/status unknown. In this study, 26% of the Class of 1992 had dropped out or their status was unknown at the time of the report. The reader should note that this is a **four** year cumulative dropout rate, which should not be confused with the **annual** dropout rates reported from data collected in a separate study.

It is believed that many students in this category were unaccounted for (rather than true dropouts) because schools lacked the data required for a longitudinal study. Many schools, in order to comply with requirements of this study and the dropout study, have improved their student recordkeeping systems to monitor student movement. The improvements in data collection and reporting are expected to have a positive effect on reported graduation rates over the next few years. In time, the status unknown portion of the four year dropout rate will be reduced to a minimum, providing a more accurate representation of the true graduation rate.

Dropouts Who Received a GED Certificate

This year, ADE provided each high school the names and birthdates of young adults who received a GED[10] certificate in the past year and reported their last school of attendance in an Arizona public school. Some schools used this and other sources to report a total of 385 students in the Class of 1992 who had dropped out but later received a GED. This represents approximately 1% of the class. The proportion is probably higher because students may have received a GED certificate in another state, or in Arizona under another name, or they may have failed to report correctly their school of last attendance. The ethnic and gender categories of GED recipients are shown below.

---

[10] General Educational Development

Table 8
GED Recipients by Ethnicity and Gender

Ethnicity/Gender	Number	% of Class
White	302	1.2%
Black	4	0.2%
Hispanic	60	0.6%
Indian	17	0.7%
Asian	2	0.3%
Male	218	1.1%
Female	167	0.8%
Total	385	1.0%

Comparison of Graduation Rates to Class of 1991

The graduation rate for the Class of 1992 was slightly higher than for the Class of 1991. Data from 145 high schools and special programs in the Graduation Rate Study for the Class of 1991 had originally indicated a mean graduation rate of 67%. However, after the Class of 1991 report was published, two schools made corrections to their data and ADE eliminated the data for two other districts when it became known their methodology was inappropriate. The revisions reduced the Class of 1991 graduation rate to 65%. This year's slight improvement in the mean graduation rates (from 65% to 67%) may be attributed to an actual improvement in the graduation rate and/or improvement in student recordkeeping, resulting in a lower number of students whose status was unknown.

Comparing the Class of 1992 to the Class of 1991, the mean graduation rates improved for all ethnic groups and both genders. The graduation rates of 53 schools improved since last year's study; 15 schools' rates remained the same[11]; and 57 schools had lower graduation rates this year.

[11] Within one percentage point up or down to account for rounding

Table 9
Mean Graduation Rates
Class of 1991 and Class of 1992

Ethnic/Gender	Class of 1991	Class of 1992
White	71%	73%
Black	54%	57%
Hispanic	55%	57%
American Indian	54%	56%
Asian	70%	77%
Male	61%	64%
Female	69%	71%
Total	65%	67%

Appendix A ranks the schools and programs by their Class of 1992 graduation rate and also shows the Class of 1991 four year rate for comparison. A substantial change in the rates from one year to the next probably indicates variances in data collection and reporting, rather than an actual change in the proportion of students who graduated. Also, in schools with small populations, slight changes in the number of graduates produced large changes in the graduation rates from one year to the next.

Five Year Graduation Rates of the Class of 1991

At the time of last year's report, approximately 6% of the Class of 1991 was still enrolled for a fifth year of high school. This year, 1,388 late graduates from that class were reported, raising the graduation rate from 65% to 69%. Fifth year graduation rates were higher for all minorities (generally 6% of the minority class members) than for Whites (3% of the White class members). The mean five-year graduation rates by ethnic group are shown in the table below.

Table 10
Four Year and Five Year Mean Graduation Rates
by Ethnicity and Gender
Class of 1991

	4 Yr.	5 Yr.
White	71%	74%
Black	54%	59%

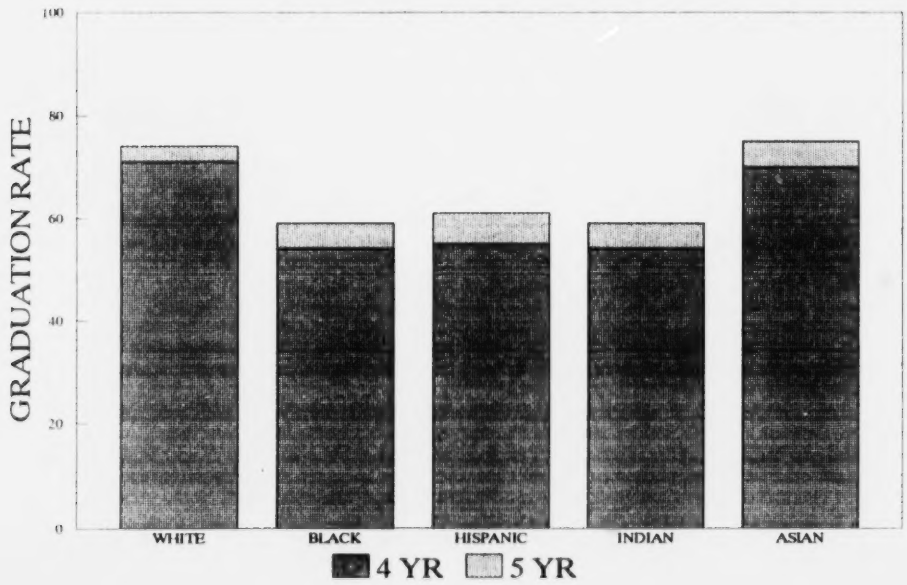
Class of 1991



Summary

The participation of all Arizona public high schools and special programs in the Class of 1992 Graduation Rate Study provided valuable insight into the outcome of high school students. Although the nature of a longitudinal study requires considerable diligence and historic data, the vast majority (90%) of the schools were able to provide valid reports. The data from those 134 high schools and one special education program represented 96 districts (95% of the districts with high schools). Schools have shown a willingness to improve student recordkeeping systems for the purpose of increasing the validity and utility of this and other studies which aid in strategic planning for more effective schools.

The proportions of students who graduated, were still enrolled, and whose status was unknown are shown in the chart below.

---

[16] San Carlos High School opened in 1991-92. This is a one year graduation rate.

[17] Polaris High School is an alternative program for high-risk students such as prior dropouts, pregnant or parenting students, and self-supporting students.

[18] Greenlee County Accommodation serves special education students.

UNRANKED SCHOOLS

The Graduation Rate reports for Window Rock, Cactus Shadows, Gila Bend, and Chinle High Schools were not included in the state rankings because they contained data which were inconsistent with the Year End Enrollment reports the school had filed from 1988-89 through 1991-92. The reports from Tucson Unified School District were excluded because the district's student database lacked critical data elements for conducting the study properly. For each of these 14 schools and seven special programs, ADE calculated an estimated graduation rate based on summary numbers from the Year End Enrollment reports. The methodology is **not** comparable to the process prescribed in the Graduation Rate Study instructions, since the individual student records were not available to ADE.

Total Completers												

COMPLETING THE GRADUATION RATE STUDY FORM

A. Original Enrollment: Number of students enrolled as first time ninth-graders at the beginning of the 1988-89 school year. Do not include ninth-graders who were retained from the prior school year, 1987-88.

B. Transfers In: The total unduplicated count of students who transferred into the Class of 1992 over the four years of the study. As with Original Enrollment, these transfer students are identified as members of the Class of 1992 by their first-time ninth-grade school year.

C. Transfers Out: The unduplicated count of students in the Class of 1992 who transferred out of your school to another school over the four years of the study. Include students who transferred to another public school, a private school, a state juvenile correction facility, or any other school within Arizona or out of state, as evidenced by a request for transcript or other verifiable information. Include students enrolled in approved home instruction.

D. Deceased: Total number of students in the Class of 1992 who died between the start of the 1988-89 school year and the end of the study.

E. Class of 1992 Population: Add Line A and Line B, then subtract Line C and Line D. This will be the base number used to calculate graduation rates.

F. Graduates: Total number of students in the Class of 1992 who completed graduation requirements or received a Certificate of Completion or Certificate of Attendance at any time during the four years of the study period. Do not include students from a prior class who completed their graduation requirements in 1992.

G. Graduation Rate: Divide the number of Total Graduates (Line F) by the Class of 1992 Population (Line E), and multiply by 100 to express the rate as a percentage.

H. Still Enrolled: Total number of students in the Class of 1992 who have not finished graduation requirements and are still enrolled in the school. Next year's report will have a line to report these students if they have graduated.

I. GED Recipients: Total number of students in the Class of 1992 who received an equivalency diploma (GED) after completion of GED testing requirements.

Class of 1991 Fifth-Year Graduates: Line O of the Class of 1991 Graduation Rate Study Report listed the number of students from that class who were still enrolled. This year, report the number of those students from the Class of 1991 who have received a diploma or GED since the Class of 1991 report was submitted.
